Founded in 1925, Allan Green & Son possess a wealth of skill and experience in the field of general precision engineering and gear cutting. We specialise in the manufacture of custom made gears, not only for a wide range of industries but also for heritage projects such as classic vehicles and machinery.

Following the take over of Allan Green & Son by Acetarc Engineering co. Ltd in June 2011, we can now also offer a range of sub contract machining services.

Our design and drawing office can accept your drawing files in most formats. We can also make gears using your existing part as a template.

We operate under an ISO9001:2008 accredited quality system.
